## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oosuka et al. [US 5,778,863] in view of Burson [US 3,949,338].

Oosuka et al. discloses an ignition coil [figure 1] comprising :

- a rod-shaped core [502];
- a secondary spool [510] having a secondary coil [512] wound thereon;
- a primary spool [514] having a primary coil [516] wound thereon;
- an outer core [508] disposed around on the primary spool and around the primary coil.

wherein the primary spool having a flange formed at a longitudinal end thereof and extending radially to cover a longitudinal end portion of the outer core.

Oosuka et al. discloses the instant claimed invention except for a resin insulator filled around the rod-shaped core.

Burson discloses an ignition coil having a core [48] with resin insulator [56] filled around the core.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to fill resin insulator around the core of Oosuka et al., as suggested by Burson, for the purpose of protecting the core.

***Allowable Subject Matter***

Claims 7-13 and 45-50 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record do not teach or suggest, in the claimed combination thereof, an ignition coil having an angled/elastic member covering the inner circumference corner of a longitudinal end portion of the outer core.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- McDougal [US 4,514,712] and Oosuka et al. [US 5,720,264].
